Ho Chi Minh City, Vietnam

EDUCATION

Ho Chi Minh City University of Technology (HUTECH)

2022 - 2026

Information Technology

Developed various Web and Mobile applications as part of academic curriculum.
Gained hands-on experience with technologies including **Java, JavaScript, Spring Boot, MySQL,** and **RESTful APIs**.
Proficient in using development tools such as **Android Studio, VS Code,** and version control with **Git/GitHub**.

SKILLS

LANGUAGES: JAVA, C# (.NET), DART, JAVASCRIPT/TYPESCRIPT, SQL, HTML, CSS.

BACKEND DEVELOPMENT: SPRING BOOT 3, ASP.NET CORE 8, ENTITY FRAMEWORK CORE, RESTFUL API DESIGN, SPRING SECURITY, JWT, SIGNALR (REAL-TIME).

ABOUT ME

Portfolio: https://portfolio-eight-blond-85.vercel.app/
I am a Full-Stack Developer Intern with a passion for building scalable web and mobile applications. I have hands-on experience working with Spring Boot for robust backend services, ReactJS for dynamic web interfaces, and Flutter for cross-platform mobile development. My goal is to leverage my technical foundation to contribute to real-world projects and grow within a professional tech environment.

PROFESSIONAL SUMMARY

As a final-year IT student at **HUTECH University**, I am seeking an internship position to apply my knowledge of **Java** and **application development** to real-world projects. My goal is to gain hands-on experience in professional workflows, sharpen my problem-solving skills, and contribute effectively to the growth of the company's projects.

PROJECTS

Major Project -Intercity Bus Ticketing System
12/2025 - 03/2026

Lead Developer

Full-stack web application for an intercity bus ticketing system, featuring a real-time booking engine and an integrated admin management dashboard.

- **Technologies:** Java 17, Spring Boot 3, Spring Security (JWT), Spring MVC, Thymeleaf, MySQL, Docker.
- **Core Engine:** Led end-to-end implementation of the booking flow: trip search $\rightarrow$ interactive seat map $\rightarrow$ secure checkout $\rightarrow$ automated confirmation.
- **Security:** Implemented JWT-based authentication and Role-Based Access Control (RBAC) to differentiate between Customers and Administrators.
- **System Integrity:** Developed a seat-locking mechanism to prevent double-booking and synchronized real-time data between the REST API and Thymeleaf frontend.
- **Admin Suite:** Built a comprehensive dashboard for managing routes and monitoring business performance through revenue and booking analytics.
- **DevOps:** Managed database schema design, data seeding, and environment configuration using Docker for consistent deployment.

FRONTEND & MOBILE: FLUTTER, REACTJS, THYMELEAF, RESPONSIVE WEB DESIGN.

DATABASES & TOOLS: MYSQL, SQL SERVER, DOCKER, MAVEN, GIT/GITHUB, POSTMAN, SWAGGER/OPENAPI.

CLOUD & INTEGRATIONS: FIREBASE, SPOTIFY WEB API, OPENAI API (AI/LLM), BASIC AWS S3.

Major Project - Music Social Network App
04/2025 - 01/2026

Feature Developer

Music Air – A cross-platform music social network integrating AI-driven insights and real-time community interactions.

- **Technologies:** Flutter (Dart), ASP.NET Core 8, Entity Framework Core, SQL Server, SignalR (Real-time), JWT, Spotify Web API, OpenAI API.
- **Core Development:** Architected and implemented end-to-end features: Secure Authentication $\rightarrow$ Spotify Integration $\rightarrow$ Social Feed $\rightarrow$ Real-time Messaging $\rightarrow$ AI-generated "Music Aura" from listening data.
- **AI & Integration:** Leveraged **OpenAI API** to analyze user preferences and **Spotify Web API** to synchronize music libraries, creating a personalized social experience.
- **Real-time System:** Developed a high-concurrency chat layer using **SignalR Hubs**, ensuring seamless instant messaging and live notifications across the Flutter client.
- **Security & Admin:** Implemented **JWT-based RBAC** (Role-Based Access Control) with policy-gated endpoints. Built a dedicated Admin Suite for user moderation, searchable paged listings, and account management.
- **System Integrity:** Managed database lifecycle via **EF Core Migrations** and ensured cross-platform data consistency through a RESTful API as the single source of truth.
